CALL FOR A CIRCULAR DESCRIBING ALL SYMPTOMS:

The symptoms of Catarrh, as they generally appear are at first very slight. Persons find they have a cold that they have frequent attacks, and are more sensitive to the changes of temperature. In this condition, the nose may be dry, or a slight discharge, thin and acrid, afterwards becoming thick and adhesive. As the disease becomes chronic, the discharges are increased in quantity and changed in quality; they are now thick and heavy, and are hawked or coughed off. The secretions are of fensive, causing a bad breath; the voice is thick and nasal; the eyes are weak; the sense of the smell is lessened or destroyed; deafness frequently takes place. Another common and important symptom of Catarrh is, that the person is obliged to clear his throat in the morning of a thick or slimy mucus, which has fallen down from the head during the night. When this takes place the person may be sure that his disease is on its way to the ungs, and should lose no time in arresting it. The above are but few of the many Catarri symptems.
